#### ◆ Process management

Software development processes in InnoInco's Development Centers are fully comply with ISO 9001:2000 standards, and some Development Centers are certified against the requirements of SEI SW-CMM and SEI CMMI SW/SE up to Level 4.

#### ◆ Project Management

Before and during the actual outsourcing effort, InnoInco's project management activities center on the outsourcing strategy, which is tied to the overall company strategy. The InnoInco's team is cross-functional and composed of personnel with the proper technical (product/service), process, and analytical skills. To minimize the risk of project failure, the InnoInco's team employs proven outsourcing and risk management methodology.

#### ◆ Risk Management

InnoInco is absolutely confident that risk assessment and risk management are important contributors to the success of an IT outsourcing venture. That's why InnoInco developed the outsource risk management framework that enables assessing and managing the risk associated to an IT outsourcing project.

#### ◆ Contract Management

Efficient InnoInco's contracts structure the relationship between the client and us in ways that are beneficial to both. InnoInco's strategy of development and negotiation of a comprehensive contract that includes an effective performance feedback mechanism is supplemented by performance monitoring and periodic contract and invoice audits as well as other measurements and controls.

#### ◆ Intellectual property Protection

InnoInco respects IP rights, takes the IP protection seriously and emphasizes on enforcing various IP protection methods. We are absolutely sure that success in the marketplace and profits will flow in a sustainable manner only if the ability of both customer and vendor to create and co-create value is protected and leveraged by using the tools of the IP system. This will also help to bolster the gains from cost savings, speed-to-market and quality of the offered outsourcing services. InnoInco actively initiates thorough initial and periodic IP due diligence inquiries and IP audits, given the significant nuances and symbiotic nature of the outsourcing relationship.
